

PYROFREE®

Sterile, Pyrogen Free & Ready To Use Vials

FEATURES

- ◆ **Unique innovative process**
Biological synthesis & analysis secured
Safety use in human studies
- ◆ **Single-use pyrogen-free vials**
Investment cost saving
Accelerated time to market
- ◆ **Patented packaging technology**
Sterilization process without any contamination due to mechanical properties & biocompatibility of PEEK polymer
- ◆ **Triple packaging**
Sterility and absence of pyrogen guarantees
Storage and production flow steps possible until the use

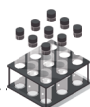

Reliable
Safe
Secure

APPLICATIONS

Diagnostic / Medical Device /
Sterile Injectable / Biotechnology /
Highly Potent Products

- ◆ For early stage development through to clinical and commercial development
- ◆ Master cell banks and cellular therapies, R&D
- ◆ Technical, clinical & commercial batches
